

Adjudication for Architects and Engineers

This book will serve as a practical guide to construction adjudication for those involved with construction disputes. It will also serve as an essential reference for training adjudicators. It covers all aspects of construction adjudication including the Housing, Grants, Construction and Regeneration Act 1996, Scheme for Construction Contracts, revisions to contracts and procedures/problems from the practical and legal viewpoint. This guide offers the practitioners comprehensive guidance on the new legislation and the revisions to the standard forms of contract.
