

Build Your Own AJAX Web Applications

AJAX (Asynchronous JavaScript and XML) is a new approach for developing web applications. It essentially permits users to interact with a Webpage without forcing a slow & tedious reload of the entire page after every action. This means web applications become more responsive, easier to use, and more intuitive. Build Your Own Ajax Web Applications uses a step-by-step tutorial format that's so easy to follow, you'll be able to build sophisticated and intuitive Ajax web interfaces in no time! Read this book, and you'll: Get an overview of the basic technologies you'll need to use to build Ajax applications. Understand the XMLHttpRequest object, the core of Ajax applications. Build a cross-browser XMLHttpRequest wrapper that you can use in all of your Ajax projects. Build an Ajax application monitor that works in real time. Learn how to use Ajax without breaking older browsers or causing accessibility issues. Get your Ajax application working with screen readers. Use dynamic animations to improve usability. Build edit-in-place functionality. Create an Ajax search application that pulls data from Amazon, del.icio.us, and Google. Fix the Back button problem. Use JSON, YAML, and XML to communicate with the server. Build an Ajax drag n drop chess game. And a whole lot more! Throughout the text, the author stresses usability, accessibility, and graceful degradation for older, less-capable web browsers.

In AJAX Web Applications you will learn how to use AJAX (Asynchronous Building a simple application with AJAX and PHP XMLHttpRequest ServerAJAX (Asynchronous JavaScript and XML) is a new approach for developing web applications. It essentially permits users to interact with a Webpage without This tutorial is an excerpt from my new book, Build Your Own AJAX Web Applications. In the three chapters presented here, we'll discuss the Quoting from Ajax: A New Approach to Web Applications, February 18, 2005 by Google is making a huge investment in developing the Ajax approach. All of For Immediate Release For a review copy, please contact sitepointpr@. For other inquiries such as excerpt or interview requests, Create responsive web applications with the power of AJAX! I think it all depends

on your level of expertise in what you're responsible for. If you're a beginner and are charged with coding everything, you're going to have AngularJS today is the biggest name when it comes to building Single Page Applications (SPAs) that extensively use Ajax but it may have a steep learning curve. This book is free to download. Build Your Own Ajax Web Applications book is available in PDF format. Learn from this free book and enhance your skills.
