

The Electrum Coinage of Cyzicus (Classic Reprint)

Excerpt from The Electrum Coinage of Cyzicus
It is not my attention in this account of the electrum coinage of Cyzicus to enter upon a history of the state in any of its relations, except so far as it may afford an elucidation of my more immediate subject. The purpose of the essay is to bring together as complete a list as is possible of all the electrum coins issued by Cyzicus during the long period of their emission, together with a reproduction by the autotype process of each type. It is hoped that this in itself will be of service to numismatists and others interested in Hellenic art and its development. No attempt to publish a full list of these numerous coins has hitherto been made since the time of Sestini, whose catalogue, on account of the scarcity of types then known, was necessarily a very imperfect one. I have long felt that until a detailed, and to a very large extent an exhaustive account was given, it was impossible that this most valuable and extensive series of coin-types could be presented to numismatic science with any prospect of being adequately studied. In the hope, therefore, that I may be able to supply these important materials for study and research to those desirous of becoming acquainted with the marvellous series of the Cyzicenes, I have prepared this account of them, the result of much labour, but not undertaken without quite corresponding pleasure. About the Publisher
Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com
This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of

imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
