

Employing feminist, queer, and postcolonial perspectives, *Global Justice and Desire* addresses economy as a key ingredient in the dynamic interplay between modes of subjectivity, signification and governance. Bringing together a range of international contributors, the book proposes that both analyzing justice through the lens of desire, and considering desire through the lens of justice, are vital for exploring economic processes. A variety of approaches for capturing the complex and dynamic interplay of justice and desire in socioeconomic processes are taken up. But, acknowledging a complexity of forces and relations of power, domination, and violence – sometimes cohering and sometimes contradictory – it is the relationship between hierarchical gender arrangements, relations of exploitation, and their colonial histories that is stressed. Therefore, queer, feminist, and postcolonial perspectives intersect as *Global Justice and Desire* explores their capacity to contribute to more just, and more desirable, economies.
