

# This Is the Wind

THE PERFECT GIFT FOR ANY NEWBORN AND THEIR FAMILY The wind leads readers and listeners through the pages of this poetic tale of two mothers—one human, one mouse—recounting the story of giving birth to their children. Lyrically and rhythmically, the repeating chorus *This is the wind that blew on the farm on the night you were born* guides us through the text as each page adds a continuing line to a song of new life. Gorgeous illustrations show the human world and the tiny mouse world, both under the same lush moonlight. A treasure for any mother-to-be or new parent.

The wind blows through the doors of my heart. It scatters my sheet music that climbs like waves from the piano, free of the keys. Now the notes stripped, black Wind isn't just mysterious, destructive and exhilarating—capturing just 2% of it would solve the planet's energy needs at a stroke. And as the specifics of a given turbine—the power for a given wind speed, as well as the annual wind distribution—are known, the annual energy production can be estimated. Inspiring and revolutionary, this is the world's first and only wind turbine that allows you to stand in a clear glass viewpod at the top of the tower, three metres high. Wind is the flow of gases on a large scale. On the surface of the Earth, wind consists of the bulk movement of air. In outer space, solar wind is the movement of ionized particles from the sun. It is the sub-atmospheric condition inside the diffuser that accelerates the wind flow and causes wind velocity augmentation. Also, using equations (8.3) and (8.7).
