

The Signs Are Good

Fifty five years of collecting autographs. From a young boy where I faced gangs on London stations, who charged collectors for the privilege to go on to the platforms to collect the prized signatures to the present time. How my collecting led to me getting my job working at a professional football club I have supported since childhood. It tells the stories of the many good experiences I had with so many top celebrities and sports people. There are some controversial views about household names that may surprise the reader. How things never worked out to plan like missing the last train home and ending up paying ?40 for a taxi without the sought after signature. Being arrested in the search of an International football teams autographs. How my whole family became friends with one of Englands finest footballers who went on to manage several football clubs and his national team. The autograph world has changed from my early collecting to present day where it is now largely frowned upon. I had always been fortunate enough to receive help from people who worked with and amongst the celebrities, which I doubt I would get too much today. So many of the stories would not happen today so I feel they should be told. Here are some of the celebrities and sports people that are covered in the book.
