

Websites on Tourism: Internet programming with Java, C#, VB.NET and PHP using Microsoft SQL Server and MySQL databases

In this book we present three websites on tourism. A Paris travel guide, the summer offers at the Romanian Black Sea resorts and the Romanian monasteries are the themes of our websites. We use Java, C#, VB.NET and PHP source codes and we work with Microsoft SQL Server and MySQL databases. For the Paris travel guide we present our implementation using a Java code and a Microsoft SQL Server database. For the summer offers at the Romanian Black Sea resorts we present a first implementation using a Java code and a Microsoft SQL Server database and a second implementation using a C# code and a Microsoft SQL Server database. For the Romanian monasteries we have a first implementation using a Java code and a Microsoft SQL Server database, a second implementation using a PHP code and a MySQL database and a last implementation using a VB.NET code and a Microsoft SQL Server database.

We have the most talented dot net-developer contractors in london. We work with a highly curated database that means you can easily find the perfect candidate to help ms-sql-server. oracle. oracle-application-server. oracle-forms. perl. php retailer. seo/sem---search-engine-optimization-&-marketing. tourism. .We have the most talented ios developer contractors in london.
