

Modern Perl

The Best Perl Programmers Use Modern Perl In 1987, Perl 1.0 changed the world. In the decades since then, the language has grown from a simple tool for system administration somewhere between shell scripting and C programming to a powerful, general purpose language steeped in a rich heritage. Even so, most Perl 5 programs in the world take far too little advantage of the language. You can write Perl 5 programs as if they were Perl 4 programs (or Perl 3 or 2 or 1), but programs written to take advantage of everything amazing the worldwide Perl 5 community has invented, polished, and discovered are shorter, faster, more powerful, and easier to maintain than their alternatives. They solve difficult problems with speed and elegance. They take advantage of the CPAN and its unparalleled library of reusable code. They get things done. This productivity can be yours, whether you've dabbled with Perl for a decade or someone just handed you this book and said Fix this code by Friday. Modern Perl is suitable for programmers of every level. It's more than a Perl tutorial-only Modern Perl focuses on Perl 5.12 and 5.14, to demonstrate the latest and most effective time-saving features. Only Modern Perl explains how and why the language works, to let you unlock the full power of Perl. Hone your skills. Sharpen your knowledge of the tools and techniques that make Perl so effective. Master everything Perl has to offer. When you have to solve a problem now, reach for Perl. When you have to solve a problem right, reach for Modern Perl.

In the spirit of re-tweeting, this is a short post to highlight some great examples of modern perl. (I'm using the term modern perl very loosely, not referring to GitHub is where people build software. More than 28 million people use GitHub to discover, fork, and contribute to over 85 million projects. I'm torn between thinking there is value in learning some Perl and not really knowing that value might be. I've found a lot of embedded wisdom This page contains some links to the book Modern Perl by chromatic. It is distributed under the Creative Commons Attribution-Noncommercial-Share
