

## Betrayal (Phantom Protectors Book 2)

For years, Gracie Lister has fostered an image of party-goer and all-around bad girl. After trying to convince her father, the leader of the Phantom Protectors, that she was just as resourceful as anyone under his command, she'd given up hope of ever being accepted, and who could blame her? Never measuring up to her father's standards was something she learned early on to embrace. Now she knows it's time to ditch the persona she's created and show the world what she's truly made of. After successfully infiltrating the last territory boss and helping to bring the man down, how hard could it be to do again? She knows she's headed in the right direction and will stop at nothing to bring down the man who threatens her happiness. When long-forgotten memories emerge, they threaten not only her game of spy she's playing but also her life. Left broken and betrayed, she struggles to find the energy and strength to fight back. Second-in-command Ridge Connors likes his life neat and tidy. He lives for the dangerous missions, constantly proving his rightful place within the Protectors hierarchy. When tasked with babysitting the one woman who is strictly off limits, he must struggle to douse the fire she ignites inside him long enough to keep her alive. Mastermind Freddie Sinclair has plans of his own to set in motion. Awakening Gracie's long-forgotten memories and secrets is part of his master plan. When she realizes she's nothing but a pawn in his game for power, the real fun begins.
