

Solar Living Sourcebook: The Complete Guide to Renewable Energy Technologies and Sustainable Living

This product is great for anyone interested in getting involved in keeping their environment healthy. The products and information contained within the pages of this book will guide the novice to the right product choice for their needs. This book is the stepping-stone for a sustainable life in harmony with nature. At the least this literature will be informative and enlighten the reader to one's place on earth. One of the major areas addressed in this catalog is waste management. The average family consumes more than fifty gallons of water a day in toilet water, which must be recycled either through chemical or natural treatment before it can be used by humans again. Another problem caused by human consumption in normal life is garbage. This book addresses both of these issues rationally and offers suggestions to limit and eliminate some of the causes of this enormous amount of consumption. Out of everything consumed by the human population, what we consume the most is energy; we need energy in one form or another to power our vehicles, homes, and to produce the products we use. This book focuses on products that use renewable energy sources the sun, wind, and water. It also informs people that some appliances, even when off, are still eating energy in the form of phantom loads, this can account for twenty-five percent of an energy bill. Addressing this issue can mean a significant savings. This book also offers products that cut energy consumption in half when in use. Another category is environmental quality of the home and office, offering healthy cleansers, an alternative to the health-threatening harsh volatile organic compounds commonly found. Features of these products are recycled material and more biodegradable components. This catalog offers a large range of products, from construction material, to household essentials, to resource guides and how-to books. It is a

great help for anyone who wants a healthy life for their family.

In print and regularly updated since 1982, the Sourcebook has sold over 1 million copies. Your Complete Guide to Renewable Energy Technologies and Sustainable Living.
