

Man and Animals: Living, Working, and Changing Together: In Celebration of the 100th Anniversary of the School of Veterinary Medicine, University of Pennsylvania

Through ancient artifacts and modern science, this richly illustrated handbook traces the development of four domesticated animals—the horse, dog, cow, and cat—important to the human community as pets, major food producers, and powerful work animals.

Since 1887, the Penn Museum has been one of the leading archaeology and anthropology departments at the University of Pennsylvania. In 1984, David Anthony's book *Man and Animals: Living, Working, and Changing Together* was published in celebration of the 100th anniversary of the School of Veterinary Medicine, University of Pennsylvania. The book traces the development of four domesticated animals—the horse, dog, cow, and cat—important to the human community as pets, major food producers, and powerful work animals.
