

The Fertility Plan: A proven three-month programme to help you conceive naturally

Infertility medicine today is all about aggressive surgical, chemical and technological intervention. But making babies originally was - and is still best as - a natural process. In the UK it is estimated that approximately 1 in every 7 couples have difficulty conceiving and 1 in 80 babies is born as a result of IVF treatment. While 75% of people seeking help with their fertility try alternative treatment, few doctors are aware of how the disciplines of Western and Eastern fertility treatment can be used together to achieve the best results. This is a unique collaboration that combines the best of Dr Davids and Jill Blakeways expertise. In THE FERTILITY PLAN they show that half of women who use IVF could have got pregnant without it if the right knowledge and advice were available to them, and they share their proven 3-month plan that increases womens chances of conceiving naturally.
