

A Life Ruined by Organized Stalking in Canada

May 17, 2016 Update: The organized stalkers have blatantly given me a message that they have hacked my computer and can remotely control it. At 8:50 PM on May 16, 2016, I was using my computer while connected to the internet. I then proceeded to watch a movie on a separate device. About a minute later the Windows Media Center on the computer that is connected to the internet launches itself. Windows Media Center is a program that is used to watch movies. I was not doing anything that required the use of Windows Media Center. In this case, the Windows Media Center could only have launched if it was instructed to do so remotely. This is a blatant message from the organized stalkers that they have hacked my computer and can control it remotely. There have been other incidents that strongly indicate hacking. On May 14, 2016, I tried to download a new operating system from the internet because I suspected my computer had been hacked. The download would always stop right before it was almost finished. This was due to the organized stalkers remotely stopping my download. On May 3, 2016, the organized stalkers caused the email account associated with this book to be suspended. I was in the process of sending an important email. After pressing send, I was greeted with the following message: Your account has been temporarily suspended. Someone may have used your account to send out a lot of junk messages or done something else that violated the services agreement. I spent countless hours trying to regain control of my email account. However, it was all in vain, as I was unable to regain control of it. Moreover, the email company declined to disclose the exact reason for the account suspension.

December 9, 2015 Update: A fake 5 star review filled with disinformation has been posted by the organized stalkers on November 20, 2015 under the username

JimmyBlues at the Amazon Canada website (amazon.ca). I do not describe any of the things he claims I describe. I do not hold his views nor am I associated with him in any way, shape, or form. The views of JimmyBlues are very radical and extreme. Mine on the other hand are peaceful and I only advocate public exposure of organized stalking. Please read the comment under his review for a detailed analysis of the disinformation campaign that he is running. (At amazon.ca, click on See the customer review, and then click on 1 comment.)

About the Book: This is a book about an innocent target who has had to endure the torment of organized stalking since the early age of 14. Take a journey with Edward Wong, a pseudonym adopted by the author, as he takes you back in time to 1991 when his nightmare all started. Tag along as he takes you from one Canadian city to another while facing adversity head on. Put yourself in Edward Wongs shoes as he undergoes the trials and tribulations that all targets of organized stalking know too well. Afterwards, learn in detail the tactics of organized stalking and the six Articles of the Universal Declaration of Human Rights produced by the United Nations that the organized stalkers so blatantly disregard. Finally, take a breather and relax as Edward Wong gives a poignant conclusion and heartfelt advice to his fellow targets of organized stalking.

From the Author Himself: I have been a target of organized stalking for over two decades since I was 14, and it is never going to end. I realize that they will continue to employ their underhanded tactics until the day I die, and nothing I do will change that fact. However, I would like to tell my story before my time on earth is up. If I never tell it, then no one would ever know the truth. In addition, it is best to expose the underhanded tactics that the organized stalkers use so that other innocent people who are targets of organized stalking can better understand their situation and cope with it. By doing this, I feel that at least my existence on earth would have at least

served a beneficial purpose.
