

Weaving a Website: Programming in HTML, Java Script, Perl and Java

A comprehensive introduction to web programming, requiring no prior programming experience, this book begins with HTML and moves to progressively more difficult programming languages JavaScript, Perl, and Java. It emphasizes a hands-on approach, and contains clear instructions for carefully chosen visual examples from a wide variety of topics that will appeal to most individuals encouraging them to find ways to capture their interests in creative web pages. Chapter topics include fonts and colors; lists; tables; anchors and images; frames and image maps; cascading style sheets; arithmetic, selection, and iteration statements; functions and objects; arrays; forms and form elements; elementary data types; and graphics. For Web Masters, Web Page Developers, and Graphic Designer for Web pages.
